### **DETAILED ACTION**

1. In view of the appeal brief filed on March 24, 2005, PROSECUTION IS HEREBY REOPENED. A new grounds of rejection is set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

(1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,

(2) initiate a new appeal by filing a notice of appeal under 37 CFR 41.31 followed by an appeal brief under 37 CFR 41.37. The previously paid notice of appeal fee and appeal brief fee can be applied to the new appeal. If, however, the appeal fees set forth in 37 CFR 41.20 have been increased since they were previously paid, then appellant must pay the difference between the increased fees and the amount previously paid.

A Supervisory Patent Examiner (SPE) has approved of reopening prosecution by signing below:

#### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Brown (US 4,651,347). Brown discloses a collar protector (12) for preventing soil on a garment collar, col. 1, lines 31-41 that includes an outer collar planar member (16) with configuration corresponding to a garment collar (14) which is longitudinally foldable to overlie the garment collar as shown in figures 1 and 2. Furthermore, an underlying member/elongated flap (22) being formed integrally with the collar planar member at a segment of an edge thereof to extend downwardly beneath an inner surface of a garment/overcoat (10), col. 2, lines 21-24 and as shown in figure 1. Additionally, the collar protector has a first complementary hook and loop material (24) being removably attached to a second complementary hook and loop material (26) onto the garment collar, col. 2, lines 25-33 and as shown in figure 3. Also, it is inherent that the collar planar member removably attached to the garment collar is formed of a disposable material that can easily be replaced.

With regard to claim 2, the collar protector is made of a non-woven fibrous material, col. 2, lines 10.
